### Profile

---

**Frontend Developer** with 4 years of hands-on experience in building scalable, performant e-commerce platforms using **Angular (Spartacus), Vue.js, and Next.js**, alongside MACH architecture tools like CommerceTools. Proven ability to deliver multi-language, multi-brand webshops in agile, multicultural teams. Eager to tackle complex UI problems and bridge frontend/backend integration in high-impact B2C environments. Experienced in **platform migration (Angular to Next.js)** and CMS-driven architecture at scale.

### WORK EXPERIENCE

---

#### **Software Developer, EPAM Systems**

02/2022 – Present

##### **Phase 1 – Junior Frontend Developer (Vue.js, Vue Storefront, CommerceTools)**

Izmir

02/2022 – 08/2022

- Developed frontend components using Vue.js and integrated with CommerceTools APIs in a headless e-commerce architecture.
- Used Vue Storefront and Storyblok CMS to build multi-brand/multi-language support.
- Worked in an Agile team delivering incremental features under mentorship.
- Gained practical experience in integrating headless commerce APIs and content-driven UI

##### **Phase 2 – Frontend Developer (Angular, Spartacus, Next.js)**

09/2022 – Present

- Led frontend development of a multi-brand, multi-language e-commerce platform using Angular (Spartacus).
- In later phases, migrated select brands from Angular to Next.js, building optimized storefronts from scratch.
- Owned and managed the entire deployment pipeline, ensuring smooth and timely releases of new features and bug fixes.
- Resolved high-priority customer support tickets efficiently through strong communication and ownership.
- Regularly conducted code reviews and mentored junior developers, upholding high code standards.
- Proactively supported other project streams and shared knowledge via internal presentations.

#### **Software Developer, Emakina**

11/2021 – 02/2022

Izmir

- Selected for the highly competitive **Talent Academy Program** following university graduation.
- Completed hands-on training under senior engineers, covering core software engineering concepts with a focus on frontend development.
- Successfully delivered assigned tasks and demonstrated strong technical growth throughout the program.
- Offered a full-time position at EPAM based on performance during the training period.

## EDUCATION

---

Computer Engineering, Celal Bayar University

09/2014 – 06/2021

Manisa

## SKILLS

---

### Frontend

Angular, RxJS (Spartacus), Next.js (React-based),  
VueJS, TypeScript, JavaScript (ES6+), HTML5, SCSS

### Architecture & Tools

CommerceTools, Vue Storefront, Storyblok CMS, Git,  
Figma, Jira, Confluence

### Concepts

MACH Architecture, Agile/Scrum, Headless CMS,  
Component-based Design

### Soft Skills

Cross-functional communication, Continuous  
learning, Mentorship, Problem solving

## LANGUAGES

---

### English - B2

(Professional Working  
Proficiency)

## PROJECTS

---

### Multilanguage Webshop (e-commerce)

09/2022 – Present

*Angular, Spartacus, Next.js, SAP SmartEdit, GitLab CI/CD, Selenium*

- Contributed to a large-scale, multi-brand and multi-region e-commerce platform built on Angular (SAP Spartacus).
- Assisted in the transition of half the brands to Next.js, mainly supporting post-go-live bug fixes and providing development support during the migration phase.
- Maintained and refactored core modules across 10+ brands, implementing performance enhancements through Angular version upgrades and code modernizations.
- Developed automated test flows using Selenium and Puppeteer for regression and smoke testing across brand storefronts.
- Monitored site health and performance via SolarWinds (synthetics & real user monitoring), proactively identifying stability issues.
- Collaborated with cross-functional teams to resolve customer support tickets, ensuring prompt communication and issue resolution when required.
- Worked with SAP's SmartEdit and Backoffice for CMS-driven dynamic content and localization.
- Provided onboarding and mentorship to newly joined developers, supporting them in task planning and code quality.

### Multistore Webshop (e-commerce)

03/2022 – 08/2022

*Vue.js, Vue Storefront v2, CommerceTools, Storyblok, SCSS*

- Contributed to a multi-brand, multi-language headless e-commerce platform using **Vue Storefront v2** and **CommerceTools**.
- Collaboratively implemented component structure and integrated content management with **Storyblok CMS**.
- Applied responsive UI design based on Figma prototypes, ensuring pixel-perfect implementation.
- Focused on **performance and accessibility optimizations**, improving core web vitals and Lighthouse scores.
